

CHRR HCS Data Repository

The CHRR HCS Data Repository was created to provide a centralized, organized location for collecting and keeping HEALing Community Study (HCS) data from multiple sources. The repository contains not only study collected data, but the associated metadata, work product documentation from the study, training materials, and much more. The repository software also makes the metadata and data searchable, sortable, and accessible via the CKAN API for third-party integration. In addition, project staff have developed a custom tagging schema, allowing data across sources to be grouped together and easily found.

Repository Access Controls

All study data in the repository are protected by access controls and must be requested before access is granted. However, the associated metadata for projects is viewable without authentication or authorization. If you have reviewed metadata for a project or set of data in the repository, you can click the “Request this data” or email chrrinfo@chrr.osu.edu to start the request process. To access data, you will need to have your own IRB protocol, or in limited cases, be added to our existing IRB protocol.

The screenshot displays the CHRR at The Ohio State University website. The header includes the College of Arts and Sciences and the CHRR logo. The navigation menu shows Home, Datasets, Projects, and Groups. The breadcrumb trail indicates the current page is Projects / Collaborative Workspace Records. The main content area features a search bar, a 'Request this data' button (highlighted with a red arrow), and a search result for '1 dataset found'. The dataset is titled 'Collaborative Workspace Records' and has no description. A PDF icon is visible below the dataset information.

Repository Projects

The repository has been organized into the following projects:

- Administrative Outcome Data
- Collaborative Workspace Records

- Media Buy
- Partner Data
- Photovoice Data
- Qualitative Ohio Data
- MediaSite
- Survey and Study Collected Data
- Sustainment Data
- Stay Safe Study

Further details about each project can be found in the repository itself by selecting a project and clicking the “About” tab. See the screenshot below:

The screenshot shows the CHRR at The Ohio State University website. The page is for the 'Survey and Study Collected Data' project. A red arrow points to the 'About' tab in the project navigation menu. The page content includes a description of the project, a list of data instruments, and a table showing 0 followers and 17 datasets.

Survey and Study Collected Data

Study-wide measures and Quantitative data collect through the REDCap survey tool. This includes the:

- SMS instruments
- Participant Information Module (PIM)
- Landscape Analysis
- Implementation Science Surveys
- Health Economics
- Jail Survey
- Full data include JCOIN with GRC
- ORCCA Tracker
- Training and Tech Assistance (TTAT)
- Reach Tracker
- Fidelity
- Campaign Evaluation Questionnaire (Facebook survey)
- Media Representative Survey

For a full breakdown of data collected, please see the [Survey and Study Collected Data](#) dataset in the this project.

CHRR at The Ohio State University | If you have a disability and experience difficulty accessing this content.

For more detailed information, you can then view publicly available datasets or metadata within the project itself. See the screenshot below:

The screenshot displays the 'Partner Data' project page on the CHRR at The Ohio State University website. The page header includes the university name and navigation links for 'Datasets', 'Projects', 'Groups', and 'About'. The breadcrumb trail shows 'Home / Projects / Partner Data'. On the left sidebar, there is a purple square with 'PD' and a section for 'Partner Data' with 0 followers and 5 datasets. Below this are sections for 'Projects' (Partner Data - 5), 'Groups' (no matches), and 'Formats' (PDF - 3, XLSX - 2). The main content area shows a search bar, a '5 datasets found' heading, and a list of datasets with their respective file formats (PDF, XLSX) and descriptions. Three red arrows point to the dataset titles: 'Overview PARTNER Data_t2', 'County sector identification_t2', and 'Relational data variable lists with notes_t1'. The dataset 'HCS_PARTNER Tool for Wave 2 (OH Site-Specific)_20220505_t1' is also visible at the bottom of the list.

For more detailed information, you can then view publicly available datasets or metadata within the project itself.

Repository Tagging

We have created a custom tagging schema to help you filter and find data of interest. These tags are:

- Data Type
- Temporal Features
- Primary Unit of Analysis
- Counties
- Study Component
- Primary Data Purpose
- Topics

You can filter a tag to view only matching datasets by clicking the tag in the left side panel. See the screenshot below:
