KEY INFORMATION
We are asking you to choose whether or not to volunteer for the HEALing Communities Study funded by the National Institute on Drug Abuse and conducted by four academic institutions: Boston Medical Center, Columbia University, University of Kentucky, and The Ohio State University. This study uses community engagement as a means to increase the use of evidence-based approaches with the goal of reducing opioid-related mortality by 40% over the course of the research study. We are asking you to participate because you are a resident of a community involved in the HEALing Communities Study and we would like you to share your opinions on the effectiveness of the communication campaign promoting the study. The details below may help you decide whether or not to participate. If you have questions, the

hcs_ceqpt_icf

contact information for the study investigator in charge of the study is provided above.

PARTICIPATIONYour participation in this study involves completing a survey. About 20,000 residents from the 67 communities involved in the HEALing Communities Study will be invited to participate in this survey. The survey will take approximately 20 minutes to complete. The survey will ask about your attitudes, thoughts, and opinions regarding the advertisements being placed in your community that promote the study and activities that may take place in your community. If at any time you are uncomfortable with any question in the survey, you can choose not to answer. You may only participate in this survey once. If you choose to participate, you may be asked to participate in future surveys (maximum of 12) for this and future campaigns. Your participation is voluntary. You may refuse to participate at any time. This study is for research purposes only. Your only alternative is to not participate.

COMPENSATIONThere is no cost to you for participating, and you will not be compensated for completing the survey. However, you will have the opportunity for one entry into a raffle for a \$100 gift card after completing each survey. One member from each of the 67 communities will win a \$100 gift card for each survey completed. Participation in the raffle is not required.

BENEFITS & RISKSYou will receive no direct benefits from participating in this study. However, your responses may help us learn more about opioid overdose deaths in your community and potential reduction strategies. There are no physical risks to participating in the study. You will not be asked to provide personal information other than basic demographics, and we will protect your confidentiality. There is a risk that someone could get access to the stored information. Despite the security measures and safeguards we will use, including not storing your name with your information, we cannot guarantee that your identity will never become known. There may be risks that at this time are unknown. Having information collected from many people helps researchers identify trends and discover better ways to work with communities to reduce opioid overdoses. After we remove all identifiers, we would like to securely store, use, and share these data for future research without additional informed consent. There may be risks which are unforeseeable.

CAN YOU CHOOSE TO WITHDRAW FROM THE STUDY EARLY?If you decide to take part in the study, you still have the right to decide at any time that you no longer want to continue. This study is voluntary. If you choose to leave the study early, data collected until that point will remain in the study database and may not be removed. The study investigator or sponsor can stop your participation at any time without your

consent for the following reasons: If you fail to follow directions for participating in the study; If it is discovered that you do not meet the study requirements; If the study is canceled; or For administrative reasons. Any new important information discovered that may influence your willingness to continue participation in the study will be given to you.

CONFIDENTIALITY We will not share your name and contact information with anyone outside of the research team. Your data will be assigned a unique, coded participant ID. Survey responses will be securely transmitted and stored at the HCS Data Coordinating Center at RTI International in North Carolina on a secure server and will contain personally identifiable information such as your name and email address. Your data will be combined with that of other participants and will only be reported in the aggregate. The study investigator, the sponsor or persons working on behalf of the sponsor, and under certain circumstances, the Institutional Review Board (IRB) will be able to inspect and copy confidential study-related records which identify you by name. **THIS STUDY IS COVERED BY A CERTIFICATE OF CONFIDENTIALITY** from the National Institutes of Health. The study investigators with this Certificate may not disclose or use information or documents that may identify you in any federal, state, or local civil, criminal, administrative, legislative, or other action, suit, or proceeding, or be used as evidence, for example, if there is a court subpoena, unless you have consented for this use. Information or documents protected by this Certificate cannot be disclosed to anyone else who is not connected with the study except, if there is a federal, state, or local law that requires disclosure (such as to report child abuse or neglect, harm to self or others, or communicable diseases), but not for federal, state, or local civil, criminal, administrative, legislative, or other proceedings; if you have consented to the disclosure; or if it is used for other scientific research, as allowed by federal regulations protecting research participants. The Certificate cannot be used to refuse a request for information from personnel of the United States federal or state government agency sponsoring the project that is needed for auditing or program evaluation by National Institute on Drug Abuse and the Substance Abuse and Mental Health Services Administration, which are funding this project. You should understand that a Certificate of Confidentiality does not prevent you from voluntarily releasing information about yourself or your involvement in this study.

WHOM TO CONTACT ABOUT THIS STUDY During the study, if you have questions, concerns, or complaints about the study, please contact the Investigator at the telephone number listed on the first page of this consent document. An institutional review

board (IRB) is an independent committee established to help protect the rights of research participants. If you have any questions about your rights as a research participant, and/or concerns or complaints regarding this research study, contact: By mail: Study Participant Adviser Advarra IRB 6940 Columbia Gateway Drive, Suite 110 Columbia, MD 21046 or call toll free: 877-992-4724 or by email: adviser@advarra.com Please reference the following number when contacting the Study Participant Adviser: Pro00038088. A description of this clinical trial will be available on <http://www.ClinicalTrials.gov>, as required by U.S. Law. This Web site will not include information that can identify you. At most, the Web site will include a summary of the results. You can search this Web site at any time. CONSENTI have read and understand this informed consent information. I have had an opportunity to ask questions if needed, and all of my questions have been answered to my satisfaction. I voluntarily agree to participate in this study until I decide otherwise. I do not give up any of my legal rights by agreeing to this consent information. Once you have read this consent form, if you choose to participate and you are 18 years of age or older, click on I agree to begin the survey. You may print this page for your records. (descriptive)
