Introduction: The Campaign Fidelity Tracker is intended to measure monthly progress and fidelity to the three communication campaigns that are delineated in the CTH Intervention Manual. For each campaign period during Wave 2, sites will implement one of five communication campaign theme options. Please use the form below to report on communication campaign activities that occur each month in each wave 2 HCS community. Data collection is intended to span from July 2022 through the end of the intervention. Even if there are no activities to report for a given month in a given community, please still submit the form for that community as there is a question to denote that no activities have occurred.
