**Read to interviewee: First, THANK YOU for agreeing to participate in this interview. As background, these interviews are being conducted with [coalition]. Informed Consent: Before we begin the interview, we need to review the informed consent process. I want to be sure that you understand that... Your participation is completely voluntary. You may end the interview at any time. We expect the interviews to last about 60 minutes or less. This discussion is confidential. Your name will not be used in any reports or articles. It is helpful for us to record the interview to make sure that we capture all the important things you are saying. Your identity will not be revealed in the recording. The recordings and the survey will be kept safe on an encrypted device associated with The Ohio State University. We will transcribe the interviews (change to word-for-word format); then, the recordings will be**

destroyed. During the interview, please try not to use names. However, if you happen to do so, please know that this information will be removed when the recording is transcribed. Items to Note about our Interview before we begin: I have an interview guide that I will use to help me remember all of the questions that I'd like to ask you. You may see me look at this guide, but please know that you have my full attention during this interview. When you have something to say, please say it. It is important for me to hear your views. Even if you have concerns or have had bad experiences OR if you think what you want to say doesn't answer the question that I've asked, please say what is on your mind. If there are any questions that you do not wish to answer, you do not have to answer; however please try to answer and be as honest as possible. In order to hear all that you have to share, I will try to remain quiet while you are speaking. Please know that I am listening. Do you have any questions before we proceed? Do you voluntarily consent to participate in the study? Do you consent to being recorded? Thank you. OK let's begin. I'll now start recording . (descriptive)
